FHIR OCH INTEROPERABILITET I SJUKVÅRDEN

- Semantisk interoperabilitet
- Bakgrund
- Dagens standarder
- FHIR och framtidens smarta plattformar för vården

SEMANTISK INTEROPERABILITET INOM HÄLSO- OCH SJUKVÅRD

Semantisk interoperabilitet handlar om hur man bäst kodar, överför och använder... inte data utan information och kunskap

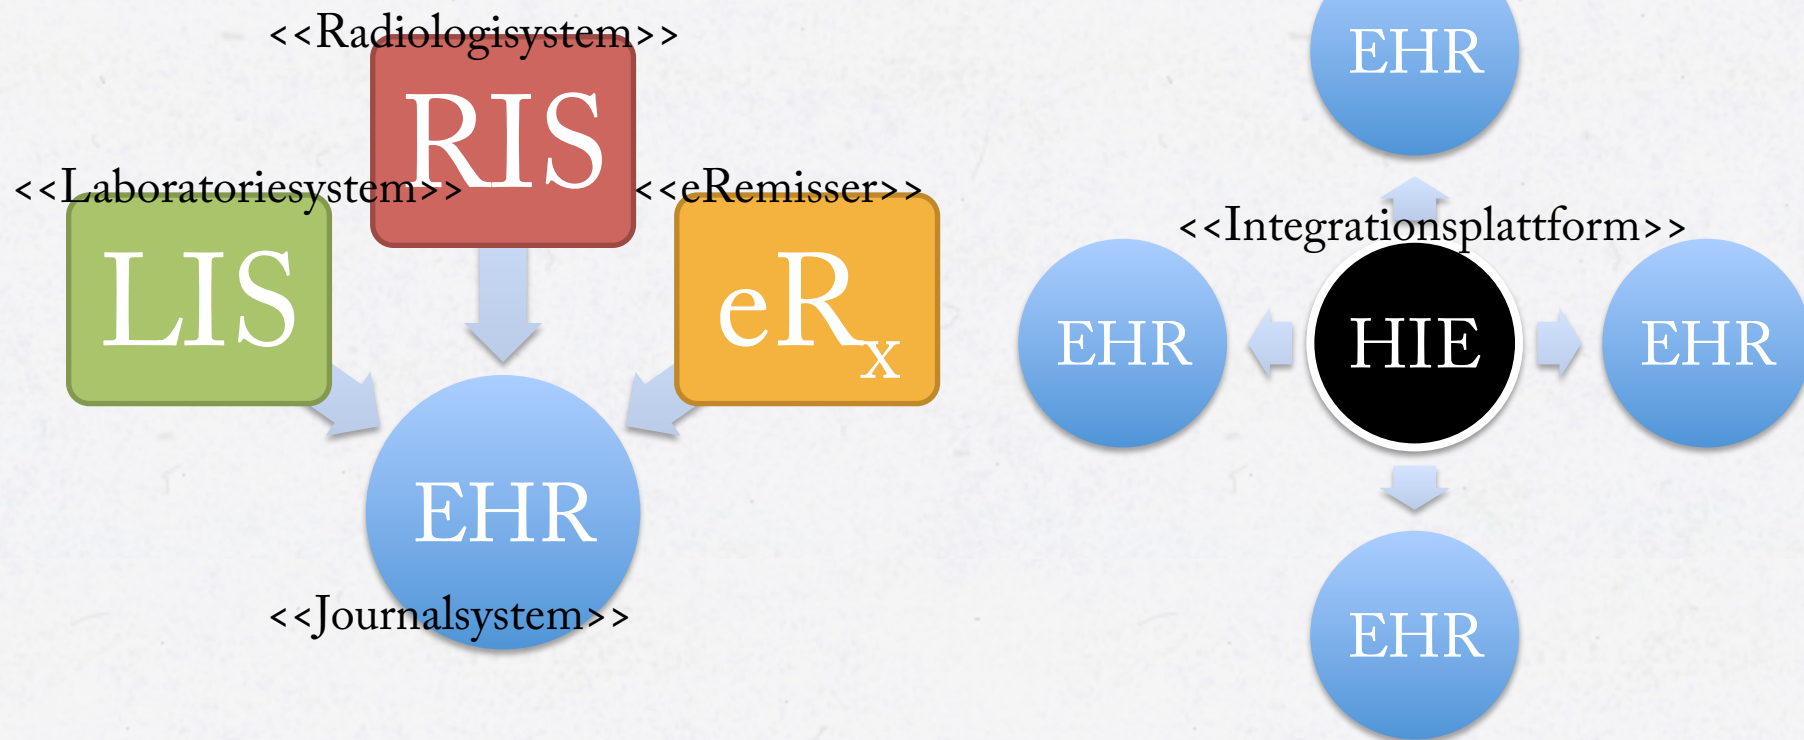

- Från medborgare/patienter, medicinsk vetenskap och andra kunskapskällor
- Mellan språkmässigt och kulturells skilda professioner, patienter, myndigheter och andra aktörer
- Över system- och organisationsgränser.

INTEROPERABILITET I SVENSK SJUKVÅRD, SNABBVERSIONEN

- 1980-2000 sker en datorisering av vården
- 2001 använder hälften av alla läkare ett elektroniskt journalsystem och idag är siffran ca 99%
- Sedan 2004 pågår arbete med nationell infrastruktur för att få informationen att följa patienten mellan vårdgivare och över systemgränser

INTRAOPERABILITET VS INTEROPERABILITET

Intraorganisatoriskt kontra interorganisatoriskt

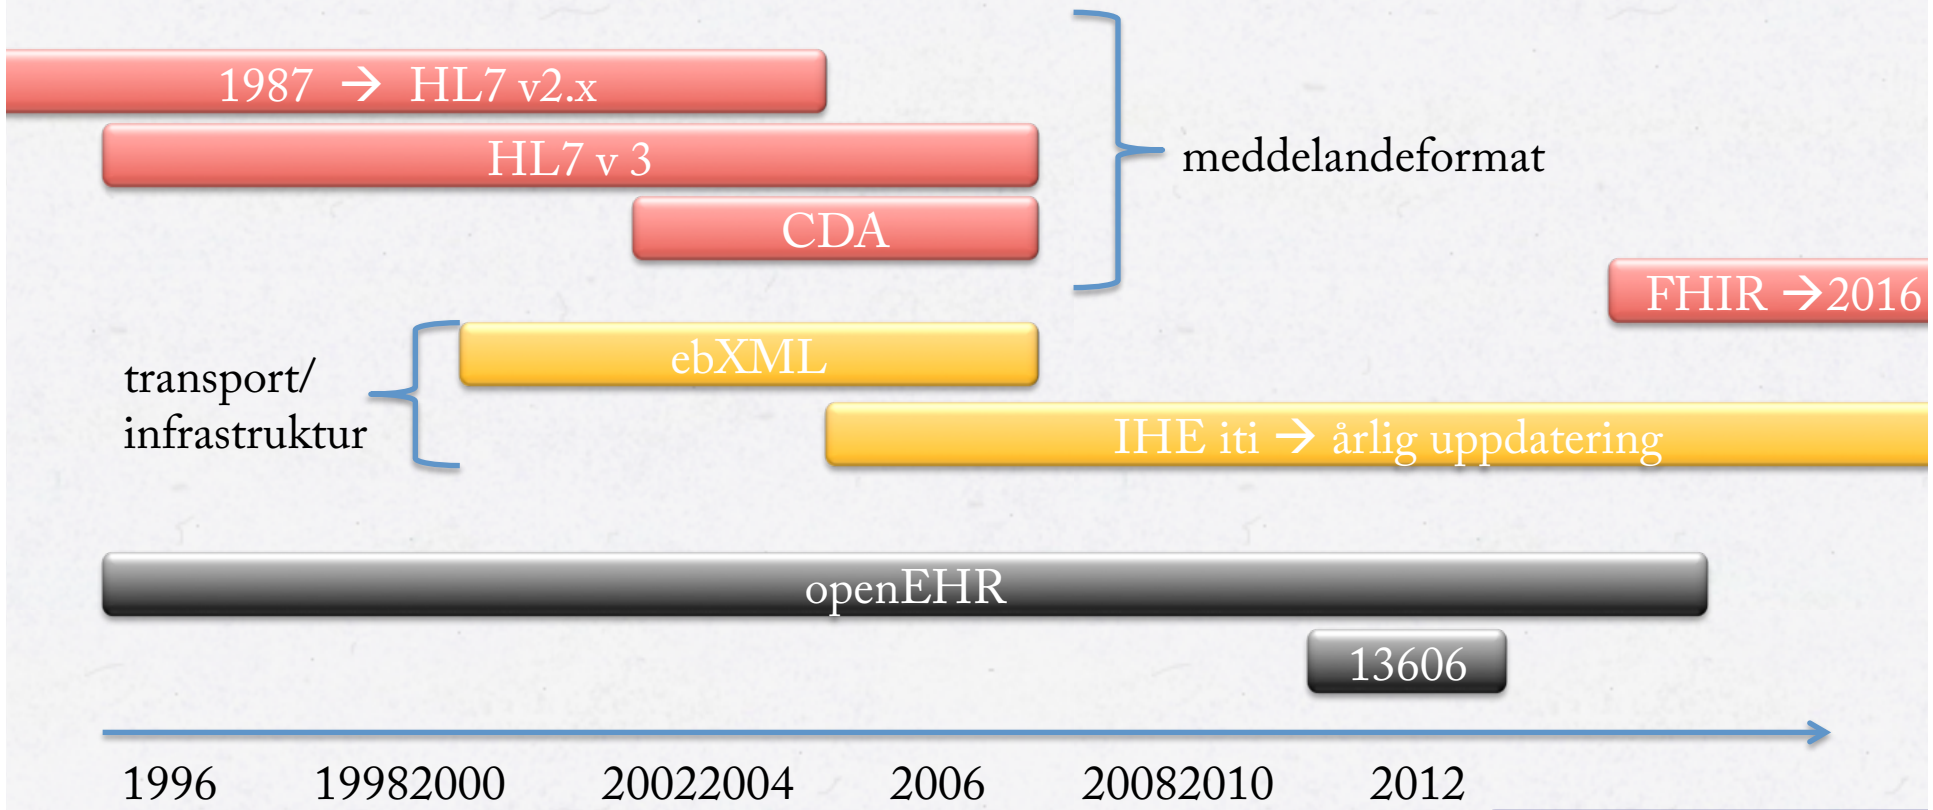

FAST INFORMATIONSFÖRSÖRJNINGEN ÄR LITE MER KOMPLEX ÄN SÅ...

HL7

- Står för Health Level Seven
- Amerikansk icke-vinstdrivande standardiseringsorganisation
- HL7 v2 – standardiserade meddelanden för specifika användningsfall, datatyper
- HL7 v3 – xml, referensmodell, domänmodeller
- CDA – Clinical Document Architecture, del av v3, standard för dokument, header och strukturerad eller ostrukturerad data

STANDARDS I HÄLSO- OCH SJUKVÅRD

HL7 V2

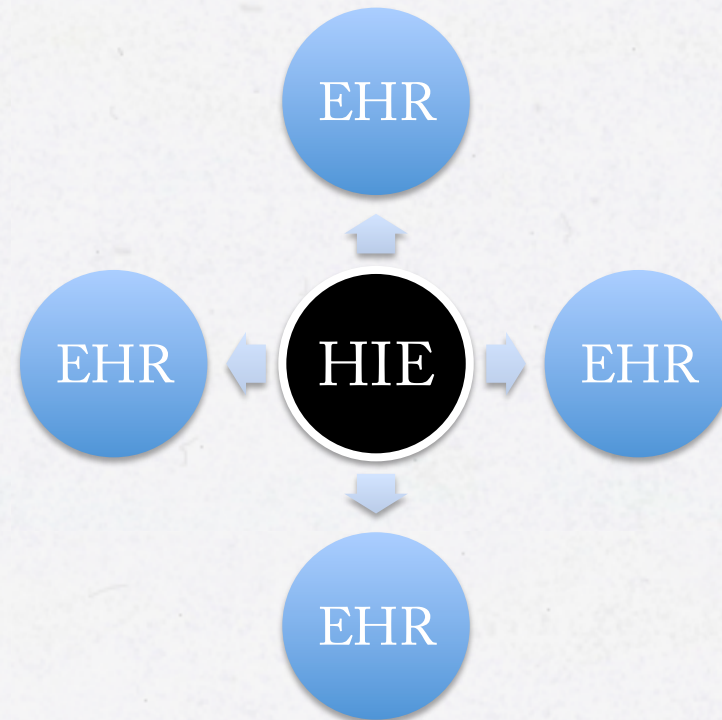

- Bra inom en organisation
- Ett hundratal användningsfall stöds
- Skalar ej för interorganisatoriskt utbyte
- (För) stor valfrihet
- Saknar gemensam modell/terminologi

EXEMPEL HL7 V2

```
MSH|^~\&|MyHospital|MyHospital^543876^CMS|LocalPharmacy|||ORM^001^RDO_001|00015|P|2.3.1

RXO|1^0nce|0026-8562^CiprofloxacinInj^NDC|200||mg^milligram^ISO+|^Injection ...
RXR|IV^Intravenous^HL70162
```

HL7 V3, CDA

- Pappersanalogi – dokumentbaserat, mänskligt läsbart, titel och rubriker
- Passar metodiken för många till många-kontrakt, stor valfrihet.
- Stor overhead, ej fingranulärt
- All verksamhetslogik i specen
- Implicit SOAP
 - Version 1 tar tid
 - Svårt att versionera
 - Krångligt bygga workflow

STANDARDISERINGENS DILEMMA

- En standard kan bara vara två av tre:

FHIR

Fast Healthcare Interoperability Resources

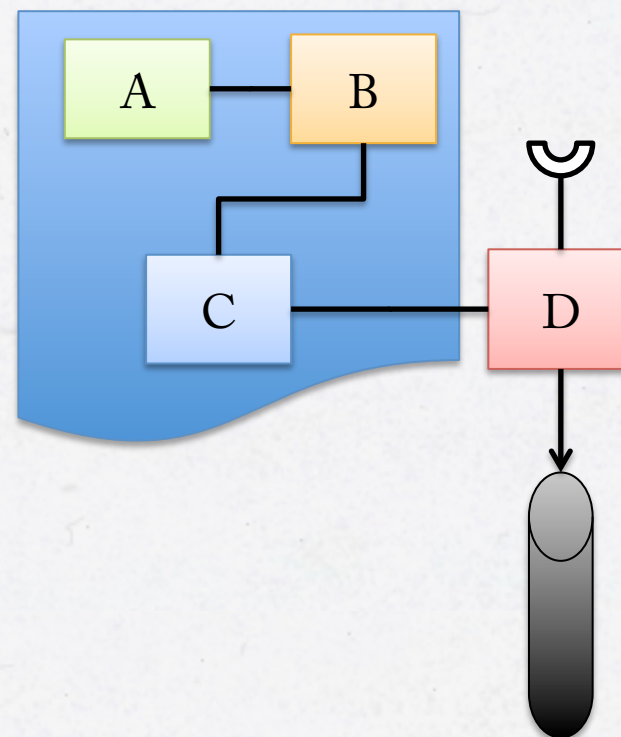

- ”Recept” på API:er att tillhandahålla istället för specar på dokument att producera.
- Första HL7 standard under öppen licens
- REST
 - XML och JSON
 - Oauth
 - Atom-liknande stöd för prenumeration
- Både infrastruktur och kliniska data
- Förenar det intraorganisatoriska med det interorganisatoriska
- Mobilvänligt, utvecklarvänligt
